

Dangers of Fentanyl

Fentanyl is an opioid meant for pain relief and anesthetic purposes. It's 100 times more potent than morphine and 50 times more potent than heroin.

Fact: It only takes **2mg** of fentanyl to be a lethal dose, which is equivalent to the size of Abraham Lincoln's nose on the penny.

Facts

- Illegal fentanyl can be found in the form of fake pills or powder. Fentanyl can be sold alone or laced in other substances like marijuana, OxyContin, Percocet, Xanax and other drugs.
- Other than in a laboratory setting, there is no way to tell if a substance contains a lethal dose of fentanyl.
- Fentanyl strips can identify if a **portion** of a substance has fentanyl but it does not reveal if the **whole** substance has fentanyl nor does it say how much fentanyl is in the substance.

- 1 kilogram has the potential to kill 500,000 people. A bag of flour is equal to one kilogram of drugs
